
CORRECTIONS

In the article by Antman EM, Anbe DT, Armstrong PW, et al., “ACC/AHA guidelines for the management of patients with ST-elevation myocardial infarction: a report of the American College of Cardiology/American Heart Association Task Force on Practice Guidelines (Committee to Revise the 1999 Guidelines for the Management of Patients With Acute Myocardial Infarction),” which appeared in the August 4, 2004, online issue of the journal (*J Am Coll Cardiol* 2004;44:e1–212), the following corrections should be made to Table 15, page e53. All of these errors have been corrected in the current online version of the article.

1. In the “Retepase” column, the “Dose” row, “× 2 each” should be replaced with “IV” and “(2nd dose 30 min after the 1st)” should be added immediately after “over 2 min” so that the line reads “10 U IV over 2 min (2nd dose 30 min after the 1st)”.
2. In the asterisk footnote, “Bolus 15 mg” should be changed to “Intravenous bolus 15 mg.”
3. In the dagger footnote, (a) “Intravenous bolus over 5 sec” should be added at the beginning of the sentence and (b) “70-79 mg” should be changed to “70-79 kg” so that the entire footnote reads as follows: “Intravenous bolus over 5 sec, 30 mg for weight less than 60 kg; 35 mg for 60-69 kg; 40 mg for 70-79 kg; 45 mg for 80-89 kg; 50 mg for 90 kg or more.”

In “ACC/AHA Pocket Guideline Based on the ACC/AHA Guidelines for the Management of Patients With ST-Elevation Myocardial Infarction” (PDF available at <http://www.acc.org>), by Antman EM, Anbe DT, Armstrong PW, et al., the following correction should be made:

On page 44, Table 11, Tenecteplase, “IV bolus over 10-15 seconds” should be changed to “IV bolus over 5 seconds” and “70-79 mg” should be changed to “70-79 kg” so that the entire footnote reads as follows: “Tenecteplase, IV bolus over 5 seconds, 30 mg for weight less than 60 kg; 35 mg for 60-69 kg; 40 mg for 70-79 kg; 45 mg for 80-89 kg; 50 mg for 90 kg or more.”
